12 June 1965

MEMORANDUM FOR: AD/ORD

SUBJECT: Meeting with [redacted]  
re New Photographic Analysis  
Equipment

25X1

1. [redacted] called yesterday and indicated that he had seen some new photographic analysis equipment which seemed to represent a marked step forward in this general art. I made arrangements to hear them out on 21 June at 11 a.m. Would you gather together your people who are interested in analysis and photo interpretation for that time.

2. They also wish to describe this to NPIC, and I agreed to make the arrangements. I believe we would be money ahead if we adopted a posture of first listening to these proposals in DD/S&T and then farming them out to other organizations. Would you therefore call Lundahl and tell him that a new photo interpretation development has been brought to our interest and that we will send the visitors on to NPIC following our meeting on 21 June.

25X1

[redacted]  
ALBERT D. WHEELON  
Deputy Director  
for  
Science and Technology
